3. *Astrol. and Astron.* An apparent proximity of two planets or other heavenly bodies; the position of these when they are in the same, or nearly the same, direction as viewed from the earth.

Formerly, two planets were said to be *in conjunction* when they were in the same sign of the zodiac, or even in adjacent signs; in modern astronomy, the term is definitely restricted to their position at the moment when they are in the same longitude or right ascension. *Conjunction* is often used simply for *conjunction with the sun* of a primary planet (formerly also of the moon, in which case it is equivalent to 'new moon'). An inferior planet may be in *inferior conjunction*, i. e. between the earth and the sun, or in *superior conjunction*, i. e. on the farther side of the sun.

The stress-mutation in OF. *conjurare*, *conjurare*, gave two corresponding forms *conjure*, *conjure* in ME., of which the former was by far the more usual, and has come down in senses 5-9; the latter occurs in Gower and prob. in Wyclif; it was commonly used in senses 1-3 before they became obs., and is now used in 4: cf. *adjure*. (The pronunciation kɒndʒəɪ now generally suggests association with the art of the modern 'conjurer' or professor of legerdemain, and is naturally avoided in referring to actions treated as religious or solemn.) Virtually therefore the verb has now split into two; but both of these are still spelt *conjure*, and in all senses *conjure* (counjour, counjer) occurs in earlier times.]

*Nomen connotativum, terminus connotativus* were used by Occam a 1347: 'Nomen autem connotativum est illud quod significat aliquid primario et aliquid secundario' (Prantl III. 364.)

1. Having the quality of connoting; pertaining to connotation, or to an additional or implied signification.

1614 SELDEN *Titles Hon.* 126 *Album*, although in a formal signification of the thing design it express a certain *Ens* per se, yet... the formal and material or connotative signification, of it, is, it's *Ens* per accidens. 1630 JACKSON *Creed* v. xiii. Pusey* 14 Secondary, symbolical, connotative senses of Scripture.

2. **Logic.** **Connotative term**: according to J. S. Mill, a term or word which, while it denotes (or is predicated of) a subject, also connotes or indicates its attributes.

In the scholastic and later logic a connotative, as distinguished from an absolute, term was one which primarily signified an attribute and secondarily a subject. In the logic of J. S. Mill this usage is inverted; the subject is 'denoted', the attribute 'connoted'. Later still, the terms 'denotation' and 'connotation' have been used in a sense synonymous with logical 'extension' and 'intension' (cf. quot. 1876 in **CONNOTATION** 2, and Fowler *Deduct. Logic* ii. (1887) 19).

1829 JAS. MILL *Hum. Mind* (1878) I. ix. 306 *Friend* is a concrete, connotative term... Its connotation is dropped by another mark, the syllable *-ship*: thus *friendship*. 1846 J. S. MILL *Logic* i. ii. § 5 A connotative term is one which denotes a subject and implies an attribute. 1872 H. SPENCER *Princ. Psychol.* II. vi. 60 The subject and predicate of the major premiss are connotative terms. 1887 FOWLER *Deduct. Log.* ii. 19 In the scholastic logic, what I have called attributives

[i. e. adjectives and participles used adjectively] are alone recognised as connotative terms.

**Connotatively** (*kpnōt'atīvly*), *adv.* [f. prec. + *-ly* 2.] In a connotative manner.

1864 BOWEN *Logic* v. 110 In Attributive Judgments the Predicate is actually thought only Connotatively.

**Connote** (*kpnōt'*), *v.* [ad. med.L. *connotā-re* to mark along with, to mark (a thing) with or in addition to (another), f. L. *con-* together with + *notāre* to mark, to **NOTE**.]

The Latin word was in common use in mediaeval logic: app. first, according to Prantl, in Duns Scotus, and frequently in Occam, and so onwards in the terminology of the schools; thence it passed into English literary use; but its use as an English technical term of logic is recent, and due to JAS. & J. S. MILL.

1. **trans.** To signify secondarily or in addition; to include or imply along with the primary or essential meaning.

1664 H. MORE *Myst. Iniq.* 271 'O θεός δ' ἀρχαίος connoting the Roman Empire as well as the Devil. 1663 SOUTH *Serm.* (1717) III. 434 Good... over and above the bare Being of a Thing, Connotes also a certain suitability or agreeableness of it to some other thing. 1872 M. PARTRIDGE *Ess.* (1889) II. 389 Deism... connotes along with natural religion a negation of the truth or reality of the Christian revelation.

2. Of things or facts: To imply or involve as a consequence, condition, or accompaniment.

a 1655 VINES *Lord's Supp.* (1677) 160 A practical remembrance which connotes affections fruitful effect. a 1677 BARROW *Serm.* (1810) I. 128 This faith doth not only denote precisely... such opinions and persuasions... but doth also connote and imply such acts of will, as... are naturally consequent upon them. 1757 WESSLEY *Wks.* (1872) IX. 243 But 'punishment always connotes guilt'. It always connotes sin and suffering; and here are both. 1867 *Sat. Rev.* 7 Dec. 719/1 A luxury which connotes a high condition of intellect and character, but still a luxury. 1878 HUXLEY *Physiogr.* xxi. 376 The descent of snow in one place connotes the evaporation of water in another locality.

+3. To combine in signifying (something); to mean in combination. *Obs.*

1786 H. TOOKER *Purley* (1798) I. 305 The cypher, which has no value of itself, and only serves (if I may use the language of Grammarians) to connote and con-signify, and to change the value of figures. 1805 *Ibid.* (1815) II. 437 Some Grammarians have said that an Adjective only connotes, and means nothing by itself.

4. **Logic.** (Of a term.) +a. With the earlier logicians: To imply or indicate the subject in which an attribute inheres, while primarily signifying or 'noting' the attribute itself. *Obs.* b. With J. S. Mill: To imply or indicate the attributes involved, while denoting (or being predicated of) the subject.

As to the change of use, see note to *Connotative term*, and cf. quot. 1829 with Heerbord above.

1829 JAS. MILL *Hum. Mind* (1878) I. i. § 5, 34 note, White, in the phrase white horse, denotes two things, the colour and the horse; but it denotes the colour primarily, the horse secondarily. We shall find it very convenient to say... that it notes the primary, connotes the secondary signification. 1846 J. S. MILL *Logic* i. ii. § 5 The word white, denotes, all white things, as snow, paper, the foam of the sea, etc., and implies, or as it was termed by the schoolmen, connotes, the attribute of whiteness. *Ibid.* The name... is said to signify the subjects directly, the attributes indirectly; it denotes the subjects, and implies, or involves, or indicates, or as we shall say henceforth, connotes, the attributes. It is a connotative name. *Ibid.* Whenever the names given to objects convey any information, that is, whenever they have properly any meaning, the meaning resides not in what they denote, but in what they connote. 1887 FOWLER *Deduct. Logic* ii. 19 A term may be said to denote or designate individuals, to connote or mean attributes or groups of attributes.

b. Hence, in general, non-technical use: To imply, include in its signification, convey to the mind or mean in actual use and application. (Often loosely used.)

1865 KINGSLEY *Lett.* (1878) II. 216 A man may believe the facts which the doctrine connotes without believing the doctrine. 1867 LEWES *Hist. Philos.* I. Introd. 64 The terms 'three and three' and 'six' denote the same relations, connote different ideas. 1871 FARRAR *17th. (ed. 2) 45 Characters which the name is not intended to connote. 1879 FARRAR *St. Paul* I. 431 The word [Council] connotes a totally different order of conceptions to those that were prevalent at that early time.

Hence **Connoted** *ppl. a.*

1829 JAS. MILL *Hum. Mind* (1878) I. ix. 300 It is often highly convenient to drop the connotation; that is, to leave out the connoted cluster.

First treated of by Prof. J. Wallis of Oxford in 1662. In his definition the name is applied to one quarter of the whole solid, formed by two sections, parallel and at right angles, respectively, to the edge, and having thus one fourth of the curved surface, and three plane surfaces, one a quadrant of the circular base.

1. One who gains possession of a country, etc., by force of arms; one who subdues or subjugates a nation; one who conquers or vanquishes an adversary, a victor. (Cf. the synonymous CONQUESTOR, CONQUESOR.)

**b.** Used as a distinctive surname or title of victorious princes; *esp.* in *Eng. Hist.* of William I, often referred to familiarly as 'the Conqueror'.

So far as English or Anglo-Fr. evidence goes, there appears no reason to think that as applied to William I, this term or its corresponding med.L. *conquestor*, *conquestor*, *conquistor* (see CONQUESTOR) meant anything else than 'conqueror' in sense 1, = *domitor* or *expugnator* *Anglorum*, *triumphator* *Anglie* of the contemporary chroniclers. The notion that *conquestor* had here only the sense of 'acquirer' or 'purchaser' as distinguished from 'inheritor' (see sense 2, and CONQUEST 5, in *Scotch Law*), appears to have been first started by Spelman (or his posthumous editors), whence it was taken by Blackstone and later writers. The historical evidence as to the use of the word shows that the appellation *Conquestor*, *Conquestor* was applied to William the Great, just as to Alexander the Great, to Charles the Great, to Jayme I of Arragon (*et Conquistador*), etc.

**Conquest** (kɒŋkwɛst), *sb.* Also 3-5 *conqueste*.

[Represents two OF. words: (1) *conquest* (now *conquêt*) *m.*:—L. type \**conquestum* (cf. *Pr. conquest*, It. *conquistò*), med.L. *conquestum*, -*quistum*, for L. *conquistum*, neuter of *pa.* pple. of *conquirere* (see CONQUER); (2) OF. *conqueste* (now *conquêt*) *fem.* = *Pr. conquesta*, Sp., It., med.L. *conquesta*, -*quista*, *fem.* *sb.* from the *pa.* pple. (parallel to *sbs.* in -*ata*, -*ade*, -*le*). The latter of these expressed the action, the former the proceeds of acquiring or conquering. Cf. *arquest*, OF. *aguest*, but *inquest*, *request*, OF. *enqueste*, *requeste*. *Conquêt*, *conquêt* are still distinct in *F.*, but in *Eng.*, through loss of final -*e* and of grammatical gender, the two forms ran together at an early date.

The original sense in med.L. and *F.* was 'acquisition, esp. as the result of effort'; including getting by force of arms as well as by other means. Hence two lines of development: first, with the feudal jurists 'personal acquisition of estate, as opposed to inheritance', without specific reference to the mode, whether by force of arms, by grant, or (in later times) by money, called PURCHASE in English Law; secondly, 'acquisition by force of arms, military conquest'. The latter of these is by far the earlier in English, and has always been (with its transferred uses) the only popular sense. The general sense of acquisition and esp. the legal sense as opposed to inheritance, is chiefly Scotch and prominent in Scotch law.]

F. conscience* (*conscience*) 12th c. (=Pr. *consciencia, consciencia, Sp. consciencia, It. coscienza*), ad. *L. conscientia* privity of knowledge (with another), knowledge within oneself, consciousness, conscience, *f. conscient-* pr. *ppl. of conscire, f. con- together + scire* to know; thus *conscire alii* to know along with another, to be privy with another to a matter, thence, *conscire sibi* to know with oneself only, to know within one's own mind.

In ME. *conscience* took the place of the earlier term *INWIT* in all its senses; cf. OHG. *gimīzza*, Ger. *gewissen*, conscience. The word is etymologically, as its form shows, a noun of condition or function, like *science, prescience, intelligence, prudence*, etc., and as such originally had no plural: a man or a people had *more or less* conscience. But in sense 4 it came gradually to be thought of as an individual, entity, a member or organ of the mental system, of which each man possessed one, and thus it took a *plural*. So *my conscience, your conscience*, was understood to mean no longer our respective shares or amounts of the common quality *conscience*, but to be two distinct individual *consciences*, mine and yours. Where the word has continued to be used without the article, as in 'the dictates of conscience', orig. parallel to 'the dictates of prudence' or 'of common sense', the prevalent tendency is to personify Conscience as 'this Deity in my bosom'. In the 15-16th c., the word appears to have been often, by reason of its final *s* sound, associated with plurals like *voits, brains, bowels*, as *fatience* is still in dialects. Cf. the illiterate spellings *consions, conchions*, etc.: hence apparently *conscion-* in *CONSCIONABLE*, *CONSCIONED*, *CONSCIONLESS*.]

II. Consciousness of right and wrong; moral sense.

4. The internal acknowledgement or recognition of the moral quality of one's motives and actions; the sense of right and wrong as regards things for

which one is responsible; the faculty or principle which pronounces upon the moral quality of one's actions or motives, approving the right and condemning the wrong.

Opinions as to the nature, function, and authority of conscience are widely divergent, varying from the conception of the mere exercise of the ordinary judgement on moral questions, to that of an infallible guide of conduct, a sort of deity within us. Popularly, the word is often used for the whole moral nature; for its gradual individualizing and personification in this sense, see note in etymology.

Hence it has become a general term for methods of compulsory enlistment; but, technically, as distinguished from universal military service, it implies the enrolment by

lot of a fixed number of those liable to service, with the option given of procuring a substitute.

4. *Nat. Philos.* Conseruation of energy or force: the doctrine that 'the total energy of any body or system of bodies is a quantity which can neither be increased nor diminished by any mutual action of those bodies, though it may be transformed into any one of the forms of which energy is susceptible'; and that the universe is such a system, of which the total energy remains the same in amount, amid all the changing forms in which it may exhibit itself. So *conseruation of mass*, etc.

App. the phrase originated with Leibnitz: see quot. *Conseruatio virtutis viuacum*, in *Fr. conseruatio des forces viues*, was in common use in the 18th c.: cf. *Vis viva*. In 1807 Young introduced the term *Energy*. In 1847, Helmholtz published a treatise *Über die Erhaltung der Kraft*; in 1853, Rankine defined 'conseruation of energy' as a technical phrase. Observ.* No. 47. 338 The law of 'conseruation of areas'. 1867 *DENISON Astron. without Math.* 203 This is called the law of conseruation of areas; and it is only the same thing in other words as saying that the angular velocity in any given orbit varies inversely as the square of the distance.

2. The most common current designation of one of the two great English political parties, the characteristic principle of which is the maintenance of existing institutions political and ecclesiastical. (*With capital C.*)

The word was first used in this sense by J. Wilson Croker in an article published on 1 Jan. 1830; and almost immediately largely took the place of the term Tory (originally reproachful), which had been in use for nearly 150 years. (Measures tending to preserve cherished political conditions

had before this been sometimes spoken of as *conservatory*.) Preference for 'Conservative' sometimes implied disavowal of the reactionary tendencies which had sometimes been associated with earlier Toryism, and espousal of the new phase introduced by Sir R. Peel; and the name was not at first received with favour by all Tories, any more than it was admitted to be properly descriptive by their political opponents. Hence many early references ridicule the word.

4. The taking into account of anything as a motive or reason; a fact or circumstance taken, or to be taken, into account; a reason considered.

6. *Law.* Anything regarded as recompense or equivalent for what one does or undertakes for another's benefit; especially, in the law of contracts, 'the thing given or done by the promisee in exchange for the promise' (Langdell 1880 § 45). It may itself be a promise. No promise is enforceable without consideration, unless made by deed.

At its first appearance (see quot. 1530) it is hardly a technical term, or distinguishable from *mutue*; it gradually acquired its precise technical meaning in the course of the 17-18th c. Natural affection was formerly called *good consideration*, as contrasted with *valuable c.*, or that which is deemed to have value in a pecuniary sense: the distinction is now only of historical interest.

1. An alphabetic or phonetic element other than a vowel; an elementary sound of speech which in the formation of a syllable is combined with a vowel. Applied both to the sounds and to the letters (the latter being the historically prior use).

While a vowel sound is formed in the larynx, and only receives its special quality by the conformation of the oral cavity through which it is sounded, a consonant sound is wholly or mainly produced in the mouth, or the mouth and nose. Vowels thus consist of pure voice or musical sound; consonants are either simple noises or noises combined in various degrees with voice. But a noise may itself be of a continuous and rhythmical character, as a friction, tili, hiss, or buzz, and those consonants in which this is markedly the case approach closely to vowels, and may perform the function of a vowel in a syllable. Hence 'the boundary between vowel and consonant, like that between the different kingdoms of nature, cannot be drawn with absolute definiteness, and there are sounds which may belong to either' (SWEET *Handbk. Phonetics* § 164). And there is in the consonants a regular gradation from those which come nearest to vowels and may function as vowels, to those which are most remote, and never so function. From this point of view, elementary sounds have been classed as (1) vowels, (2) semi-vowels (Eng. y and w), (3) liquids (l, r, ʃ, ʒ), (4) nasals (m, n, ŋ), (5) fricatives or spirants, voice (v, ð, z, ʒ, ɣ), and breath (f, p, s, ʃ, x), (6) mutes or stops, voice (b, d, g), and breath (p, t, k). Class 2 are more strictly the vowels, i, u, functioning as consonants, and classed as consonants; classes 3, 4, 5, are capable, in a decreasing measure, of functioning as vowels; only class 6 have the consonantal function exclusively, p, t, k, being the most typical consonants. The use of the liquids and nasals as vowels or consonants is a prominent feature in Indogermanic Phonology. (See *VOWEL*.) Consonants may also be classed, according to the part of the mouth where they are formed, into labials (p, b, f, v, m, w), dentals, palatals, gutturals, and other minor groups. (See these terms.) In the Roman alphabet (with its Greek accretions), the historical vowels are a, e, i, o, u, y; down to the 16-17th c., i and u were used both as vowels and consonants, a double function served by y and w in various modern languages.

**Consort** (*kɒnsɔːt*), *v.* [Found first in end of 16th c. The origin and early history are obscure and complicated. It is possible that the different senses had two or even three different origins. Thus, branch I was app. formed on CONSONT *sb.* 1, with the notion of 'act as a consort to'. Branch II cannot be separated from a simple verb SORT, very common from c 1570 onwards in all the senses 3-6 below. In sense 3 there was obviously sometimes association with L. *sors*, *sorstem*, F. *sort* lot, fate, destiny. Branch III is intimately associated with CONSONT *sb.* 2, branch II. But even if thus originally distinct, the senses appear to have been considered as belonging to one word, and to have mutually influenced each other, for some uses combine the different ideas: cf. 4, 5, with 1; 7 with 3, 5, 6. Cf. also *obs.* It. *consortare* 'to consort together' (Florio, 1611), f. *consorte* mate, consort, There were also med. L. vbs. *consortare*,

Other med. *L.* forms were *conestabilis*, *conestabilis*, etc.: see *Du Cange*. The early development of the sense, whereby the *comes stabuli*, from being the head groom of the stable, became the principal officer of the household of the Frankish kings, and of the great feudatories, and the field-marshal or commander-general of the army, had taken place before the word came into English; the development was parallel to that of *marshal*. 2. *spec. a. Constable of France*: the principal officer of the household of the early French kings, who ultimately rose to be commander-in-chief of the army in the absence of the monarch; he was the supreme judge of military offences and of questions of chivalry, and had the regulation of all matters connected with tilts, tournaments, trials by combat, etc.

The office was abolished in 1627; the title was revived by Napoleon I, but discontinued on his overthrow. An officer bearing the name of constable existed also in the households of the great feudal lords of France.

b. *Constable of England, Lord High Constable*: one of the chief functionaries in the English royal household, with duties and powers similar to those of the same officer in France.  
 Together with the Earl Marshal, he was the judge of the Court of Chivalry, and in early times his powers of jurisdiction were extensive. The office, which had been made merely titular a few years before, was forfeited by Edward Stafford, duke of Buckingham, in 1521; since which time the title has been granted only temporarily for particular occasions, esp. the sovereign's coronation. Thus the Duke of Wellington was Lord High Constable at the coronation of Queen Victoria.

7. The system or body of fundamental principles according to which a nation, state, or body politic is constituted and governed.

This may be embodied in successive concessions on the part of the sovereign power, implied in long accepted statutes, or established gradually by precedent, as in the British Constitution; or it may be formally set forth in a document framed and adopted on a particular occasion by the various orders or members of the commonwealth, or their representatives, as in the Constitution of the United States, the various Constitutions of France after 1790, and those of other nations, framed in imitation of these. In the case of a *written Constitution*, the name is sometimes applied to the document embodying it. In either case it is assumed or specifically provided that the constitution is more fundamental than any particular law, and contains the principles with which all legislation must be in harmony.

This sense gradually arose out of the prec. between 1689 and 1789: see the early quotes.

[1689 *Declar. Estates of Scotl.* 11 Apr., Whereas King James the Seventh .. did by the advice of wicked and evil counsellors invade the fundamental constitution of the kingdom, and altered it from a legal limited monarchy, to an

4. Compulsion put upon the expression of feelings  
or the behaviour, whether by the restraint of natural  
feelings and impulses, or by assuming such as are  
not spontaneous; hence always implying un-  
naturalness or embarrassment.

b. a. *Physics.* Any special physical or molecular  
condition into which a body is brought by the  
operation of some force, and lasting during its  
operation, e.g. a state of tension.

which the solids are often broken, in consequence of the  
state of constraint in which the particles are held. 1881  
MAXWELL *Electr. & Magn.* I. 156 The state of constraint,  
which we call electric polarization.

b. *Dynamics.* See CONSTRAIN v. I e.

A body has in the most general case six degrees of free-  
dom, viz. three of translation and three of rotation; if there  
is a hindrance to one or more of these, the motion of the  
body is so far constrained; hence, *degrees of constraint*.  
Thus if one point in the body is fixed, it cannot have motion  
of translation, but has all the degrees of rotation; if two  
points are fixed, its only motion can be that of rotation  
about an axis passing through these two points; it has  
thus one degree of freedom, and five degrees of constraint:  
a sphere moving between two parallel tangent planes has  
only one degree of constraint; a cube under the same con-  
ditions has three. *Kinetic constraint*: the condition that  
a body shall move subject to certain relations: e.g. that  
a body shall roll on a plane. *Principle of least constraint*:  
the theorem enunciated by Gauss in 1829, that when there  
are connections between parts of a system, the motion is  
such as to make the sum of the constraints a minimum.

string attached to a moving Point, etc. 1862 B. PRICE

we measure constraint by the square of the distance between  
the actual place of *ym* and the place which it would have if  
it were under the action of the same forces and were a  
single unconstrained particle, then the theorem is, that the  
sum of the products of each particle and its constraint is a  
minimum.

2. *adj.* In *Construct state*, *state construct*, in grammar of Hebrew and other Semitic languages: the form of the substantive used when standing before another having an attributive (or genitive) relation to it, which may be translated by the nominative (or other case) followed by *of*, as *ba'yith* house, *deyth-höhr* in house of God.

It is distinctive of the Semitic languages that in expressing such a notion as *house of God*, they do not, like the Aryan languages, put *God* in the genitive, but, retaining this unchanged, put *house* in the 'state construct'. In this form the substantive becomes accentually combined with that which follows, losing its independent stress, and undergoing various consequent changes, as loss or lightening of vowels, of inflexional consonants, etc.

1. In the Roman and French Republics.

1. The title of the two annually elected magistrates who exercised conjointly supreme authority in the Roman Republic; the title without the function was retained under the Empire.

The Roman reckoning of time was by the names of the two consuls for the year.

2. Hence given as a title to the three chief magistrates of the French Republic, from 1799 to 1804. The First Consul (who was Napoleon Bonaparte) had all the real power, the Second and Third Consuls having only a consultative voice.

1802 G. ROSE *Diaries* (1860) I. 460 The late discussion with the First Consul. 1836 *Penny Cycl.* V. 127 The consuls, or rather the first or chief consul (for the other two were appointed by him, and acted only as his advisers and assistants) proposed the laws.

II. Senses chiefly founded upon etymological connexion with L. *consulere* to counsel, consult.

Henry of Huntingdon, and others who used the same affected style, thought it fine to say 'Consul' instead of 'Comes'.

† **Consume**, v. 2 Obs. [a. F. *consume-r*, variant form of *consumer*, *consummer*, ad. L. *consummare* to CONSUMMATE; cf. CONSUMMARE.]

The proper F. repr. of L. *consummare* is *consummer* (14th c. in Littré), but this was often spelt after its L. original, *consummer*, and by consonant-simplification *consumer*. It was thus brought into association with L. *consumere*; the senses of the two verbs came also into contact in the notion 'finish, constructively or destructively', and during 15-16th c. both were entirely merged in the forms *consummer*, *consummer*, *consumer*. Subsequently they have been partly differentiated; but *consumer* with its derivatives *consumation*, etc. still retains the sense of 'consume victuals', which belongs etymologically to *consumer*. Cf. CONSUMPTION. In English, the confusion, which we originally received from F., was rectified at the Revival of Learning in the 16th c.]

*Cotemporary* is the original form, and that approved by Latin analogies; cf. the preceding and following words. But the variant *co-temporary* was used by some in the 17th c., and though characterized by Bentley as 'a downright barbarism', it became so prevalent after c1725, as almost to expel *cotemporary* from use. Towards the end of the 18th c., the latter rapidly recovered its ground, and *cotemporary* is now used by comparatively few. It has been defended on the ground that it is a purely English formation, like *co-divine*, *co-glorious* (see Co. 2); but this is a mere fancy generated by mechanically dividing the word, without regard either to its history or to its meaning. Historically, *cotemporary* is a substitute for *cotemporālis* and *cotemporāneus* (either of which might well have been retained instead); in signification, *co-temporary* would analogically mean 'unitedly, conjointly, or equally temporary', whereas

*cotemporary* has no affinity with the English sense of 'temporary', and no connexion with that word except that both are derivatives of L. *tempus* and its adj. *temporarius*]

b. *Law or principle of continuity*: the principle that all change, sequence, or series in nature is continuous, and that nothing passes from one state to another *per saltum*.

The phrase originated with Leibnitz. In 1687 he laid down as a general principle, that where there is continuity between data, such that one case continually approaches and at length loses itself in another, there will be a corresponding continuity in results or properties. For example, it is a property of the ellipse that all rays from the one focus are reflected from the curve to the other; in the parabola all such rays reflected at the curve are parallel; if there be given a series of ellipses continually approaching the parabola by the continuous increase of distance between the foci, the focal radii of these will continuously approach the relation of parallelism, so as at length to differ from it by less than any assignable amount. This was according to Leibnitz 'a principle of general order', having its origin in the mathematical infinite, absolutely necessary in Geometry, but holding good also in Physics, because the Sovereign Wisdom, the source of all things, acts as a perfect Geometer, and according to a harmony that admits of no addition. In 1702 he referred to this principle as 'the law of continuity', and claimed that it operates in all natural phenomena; and in his *Nonnexus Essais* he declared it to be part of his 'Law of Continuity' that everything in nature goes by degrees, and nothing *per saltum*.

**Contra**, *prefix*. The L. adv. and prep. *contra* (see *prec.*) came to be used in composition; this use, rare in cl. L., was much extended in late L. and Romanic. In the modern Romanic langs., the prefix retains the L. form, except in Fr., where it has duly become *contre*. In words taken into English from OF., this became *COUNTER*-, which is the predominant form of the prefix: *contre*-appears in a few non-naturalized words from modern French. But in words derived directly from L. or It., or formed after these, *contra*- is retained, with the following uses:

1. In L. *contra*, construed adverbially with certain verbs, tended at length to be written in combination, as *contra dicere*, later *contrādicere*, 'to speak on the opposite side', hence 'to speak in opposition (to a statement or person)', and so 'to contradict'; *contra-pōnere* to place on the opposite side, to counterpose; *contra-scribere* to write opposite, to countersign; *contra-venire* to come in the opposite direction, oppose, whence to contravene.

The later tendency has been to treat the prefix prepositionally, so making the compound transitive. Verbs and esp. verbal derivatives of this type are numerous in English: cf. *contra-acting*, *-distinguish*, *-divide*, *-colluctation*, *-rotation*, etc.

2. In late or med. L. *contra-* was used in prepositional combination with an object, as in *contrā-jūris* = Gr. *παράνομος*, contrary to law. This was much developed in Romanic, and extended to the formation of sbs., e.g. in 16th c. It. *contrabando* that which is against proclamation or statute, *contraband*, *contrapelo* what goes against the hair or grain, *contrastomaco*, etc. Eng. has several adjs. so formed, and some sbs., as *contra-civil*, *-focal*, *-rational*, *-regular*, *-scriptural*, *contraregularity*, etc.

3. *Contra-* is used in Romanic to indicate a thing made or acting against, in opposition to, in reply to, or as a substitute for, another of the same kind. Probably these were orig. akin to class 1, but in course of time some of them tended to the notion of class 2: cf. 16th c. It. *contralettera* reply or opposition-letter, *contramuro* an opposition wall, *contramina* an opposition mine, *contrascarpa* a counterscarp, and many terms belonging to attack and defence; *contramaestro* the master's mate in a ship, *contralossico*, *contravuleno* counterpoison, antidote; cf. *contra-approach*, *-proposal*, *-remonstrance*, etc.; but the ordinary Eng. repr. is COUNTER.

4. In It. *contra* is used esp. in musical terms, perh. starting from *contrapunto* counterpoint (which in its general sense belonged to 2 or 3). Thus *contrabasso*, *contralto*, *contratenore*, parts marked on the stave alongside of (above or below) and opposite to the *basso*, *alto*, *tenore*, etc.

In the names of musical instruments and of organ-stops it denotes a pitch of an octave below; as in CONTRABASS; *Contrafagotto*, the double bassoon, also an organ reed-stop of similar tone; *Contra-bourdon*, *Contra-gamba*, *Contra-hautboy*, *Contra-positone*, names of organ-stops an octave lower than the ordinary *bourdon*, *gamba*, etc.; so *Contra-octave*, the 16 ft. octave of the organ, or the corresponding octave on other instruments.

1877 STAINER *Organ* iii. Stops. *Contra Hautboy*. *Contra Positone*. *Contra Bourdon*. 1880 Grove's *Dict. Mus.* I. 153/2 Beethoven never fails to employ it [the bassoon] largely, reinforcing it in some works by the *contrafagotto*. 1881 C. A. (In mod. It., a single consonant following *contra* is doubled, e.g. *contrabando*, *contrabasso*, *contrapunto*, *contramina*, etc. In dealing with the words historically, the older 16-17th c. spelling, being that which came into contact with Eng., has been used.)

† **Contra-acting**, *ppl. a. Obs.* [CONTRA-1.] Acting in opposition: cf. COUNTERACT.

**Contre-dance**, *ll.-danse, contra-dance*. [after F. *contre-danse*, lit. and Sp. *contra danza*, all corruptions of the English word *COUNTRY-DANCE*, by the conversion of its first element into the F. *contre*, It., Sp. *contra* against, opposite.] A *COUNTRY-DANCE*; esp. a French country-dance.

The English country-dance was introduced into France during the Regency 1715-23, and thence passed into Italy and Spain; cf. *Littre*, s. v. *Contre-danse*, and *Venuti*, *Scoperte di Ercolano* (Rome 1748) 114 'I canti, i balli . . . che a noi sono pervenuti con vocabolo Inglese di contraddanze, *Country Dances*, quasi invenzione degli Inglesi contadini'. The arrangement of the partners in a country-dance in two opposite lines of indefinite length easily suggested the perversion of *country* into *contre*, *contra*-opposite. *Littre*'s theory, that there was already in 17th c. a French *contre-danse* with which the English word was confused and ran together, is not tenable; no trace of the name has been found in French before its appearance as an adaptation of the English. But new dances of this type were subsequently brought out in France, and introduced into England with the Frenchified form of the name, which led some Englishmen to the erroneous notion that the French was the original and correct form, and the English a corruption of it. Thus a writer in the *Gentleman's Magazine* 1758, p. 174 said, 'As our dances in general come from France, so does the *country-dance*, which is a manifest corruption of the French *contre-danse*, where a number of persons placing themselves opposite one to another, begin a figure'. Partly under the influence of this erroneous notion as to the etymology, partly as a mere retention of the French form,

*contra-dance*, *contre-dance* have been used, and *contre-dance* is still in use, esp. for a French or foreign dance of this type.

*Conventicle* (kɒvəntɪkl̩). Also 4-5 *-icle*.

[ad. L. *conventiculus* assembly, meeting, association, also place of assembly; in form dim. of *conventus* assembly, meeting, but not having in cl. L. any diminutive or depreciatory sense.

It was applied, app. by the Roman Christians themselves, to their meeting-houses, or places of worship, and is so used in the edict of Galerius, A.D. 311, permitting them to be rebuilt. In med.L. the word began to receive a derisive or contemptuous, and hence bad sense; according to Du Cange 'de hæreticis proprie dicitur'. The 4th Council of Carthage has 'conventicula hereticorum non ecclesie sed conciliabula appellantur' (Du Cange), where, however, the word itself is merely 'assembly', or 'little assembly'; but assemblies of separatists, heretics, or reformers, being usually small and private, in comparison with the great public assemblies of the popular church, were naturally designated by the diminutive form, which gradually acquired from this association an unfavourable connotation. In English, the word has been used in the good or neutral sense received from ancient Latin; also, in the opprobrious sense in reference to private or clandestine meetings, first of a civil or political, and afterwards of a religious character. Although the ecclesiastical application arose directly out of the political, and was never thoroughly distinct from it in English Law, it was in common use largely affected also by the mediæval association with meetings of sectaries or heretics. Cf. F. *conventicula*, 16th c. in Littré, 'prohibition des conventicules (pour le protestantisme)'. In all the early verse quotations, from Shakspeare, Beaumont and Fletcher, Daniel, Crowne, Butler, Dryden, etc., it is accented *conventi-cle* or *conventi-cle* (rhyming in *Hudibras* iii. ii. 1388 with 'stickle'; Bailey's folio, 1730-6, accents *conventi-cle*; and Cowper, *Tasli* ii. 437, originally wrote 'the nasal twang, At conventicle heard'; but altered it in ed. 3 (1787) to 'Heard at conventicle'.]

† 3. A meeting or assembly of a clandestine, irregular, or illegal character, or considered to have sinister purpose or tendency. *Obs.*

In many of the quotations *conventicle* is associated with other terms, as *congregation*, *gathering*, *assembly*, the unfavourable sense being conveyed by the context; but it is evident that the term came to be considered as specially fitted to express disapprobation. b. *spec. in Eng. Hist.* A meeting of (Protestant) Nonconformists or Dissenters from the Church of England for religious worship, during the period when such meetings were prohibited by the law.

This specific application gradually became distinct after 1593, and may be said to have been recognized by the 'Conventicle Act' of 1664; for although the word there occurs in constant conjunction with *assembly* and *meeting*, and always with qualification, it was entitled 'An Act to prevent and suppress seditious conventicles', by which title it is cited in the Act of Toleration of 1689. The application to Nonconformist worship after its legalization or 'establishment' in 1689, and esp. after the repeal of the Conventicle Act in 1812, comes, according to circumstances, from a historical survival of the idea of illegality or from a living idea of schism or heresy.
